EDUCATION

Gyan Ganga Institute of Technology and Sciences, Jabalpur <i>Bachelor of Technology in Computer Science and Business Systems</i>	2022 – present CGPA : 7.14
Maharishi Vidya Mandir, Jabalpur <i>C.B.S.E. Class 12th Boards</i>	2021 – 2022 Percentage : 77.8%
M.G.M Higher Secondary School, Jabalpur <i>I.C.S.E. Class 10th Boards</i>	2019 – 2020 Percentage : 80.3%

PROJECTS

WebChat — Real-Time Chat Application <i>Node.js, Express, MongoDB, Socket.IO</i>	Nov 2024 – Jan 2025
- Developed a full-stack real-time chat application with one-on-one messaging and typing indicators - Implemented user authentication using JWT and protected private routes for secure conversations - Built responsive UI with React, supporting user search, chat creation, and online status display - Integrated Socket.IO for instant message delivery, typing notifications, and real-time updates - Designed RESTful APIs for user, chat, and message management using Express and MongoDB - Handled backend performance by optimizing queries and implementing pagination for chat history	
Foodify — MERN Food Delivery Platform <i>React, Node.js, Express, MongoDB, JWT</i>	Jan 2025 – Present
- Developed a full-stack food delivery application with real-time order tracking and payment integration - Implemented JWT-based authentication, role-based access (user/admin/restaurant), and secure API endpoints - Built intuitive UI using React and Redux Toolkit with restaurant and admin dashboards for menu and order management - Integrated Razorpay for secure online payments and order confirmation workflows - Added real-time order status updates using WebSockets with Socket.IO - Optimized MongoDB queries using indexes and aggregation pipelines, reducing read latency by 40%	
AYUSH Startup Registration Portal — Smart India Hackathon 2024 <i>React, Node.js, MongoDB</i>	Aug 2024
- Participated in SIH 2023 under Ministry of AYUSH problem statement focused on simplifying the startup registration process in the AYUSH sector - Developed a unified web platform that integrates multiple government portals involved in AYUSH startup registration - Implemented secure user authentication using JWT with role-based access for startups and government officials - Built dynamic forms, status tracking, and document upload modules for a smooth registration workflow - Integrated REST APIs to fetch and submit data across different ministry and regulatory bodies	

TECHNICAL SKILLS

Languages: Java, JavaScript, C, C++
Development: React, Node.js, Express.js, WordPress
Databases: SQL (MySQL), NoSQL (MongoDB)
UI Frameworks: HTML5, CSS3, Bootstrap
Developer Tools: Git, GitHub, Docker, VS Code, IntelliJ, Eclipse
Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems, Software Engineering, Cloud Computing, Artificial Intelligence

ACHIEVEMENTS

- Solved 100+ problems on LeetCode and GFG
- Participated in Smart India Hackathon (SIH) 2023
- Actively Participated in Smart India Hackathon (SIH) 2024
- Participated in TCS CodeVita 2024, a global coding contest with over 2.5L participants
